

Fischer Nylon Dübel SX Plus 6x30 mm (Packung 100 Stück)

Produktbeschreibung

Fischer Expansion Plug SX Plus The SX Plus nylon anchor features 4-way expansion, delivering exceptional performance in solid building materials such as concrete, solid bricks, and aerated concrete. Its unique design includes innovative locking wings at the neck that grip the drill hole's center, securely holding the screw before installation, especially useful for overhead applications. The anchor's rim prevents it from sliding deeper into the hole while still enabling through-hole installation. Made from high-quality PA-6 nylon, the SX Plus anchor ensures safe and reliable fixation for long-term durability. Extended variants in diameters of 6, 8, and 10 mm are available, offering increased load capacity in soft and vertically perforated materials. Key Features: 4-way expansion for maximum performance in solid materials. Innovative locking wings hold screws in place before installation. Designed for use in concrete, solid bricks, and aerated concrete. Rim prevents slipping into the hole while allowing through-hole mounting. Made from durable PA-6 nylon for long-term reliability. Extended versions available in diameters 6, 8, and 10 mm for higher load capacities in soft and perforated materials. Old versions SX: F004362 SX 6x30 mm (pack 100 pcs) F004363 SX 8x40 mm (pack 100 pcs) F004364 SX 10x50 mm (pack 50 pcs) F004368 SX 6x50 mm, L, extended (pack 100 pcs) F004369 SX 8x65 mm, L, extended (pack 50 pcs) F004370 SX 10x80 mm, L, extended (pack 25 pcs)
