Product description

Riex JC55 Bolt for Eccentric Shelf Housing, Euroscrew, 5x11 mm The Riex JC55 bolt is specifically designed for use with eccentric housing nuts, providing a secure and durable connection for shelves and partitions. Euroscrew ensures precise fitting and compatibility with pre-drilled holes. This bolt is crafted to work seamlessly with the Riex JC55 eccentric nut, making it an essential component for reliable furniture assembly. The zinc-plated finish offers enhanced resistance to corrosion, ensuring long-lasting performance in residential and commercial applications. Key Features: Designed for use with eccentric shelf housing nuts (e.g., Riex JC55) Euroscrew for precise and stable fitting Screw into $\varnothing 5$ mm pre-drilled holes for quick and easy installation Zinc-plated finish enhances durability and corrosion resistance Ideal for residential and commercial furniture assembly
