Product description

Riex JC62 Connector Shelf Housing TOP 18/20 mm The Riex JC62 knock-in plastic housing is a versatile solution for securely anchoring shelves or fixed partitions using eccentric connector bolts. Designed for drilled shelf holes, it ensures a snug and stable fit. This housing can be locked using a PZ screwdriver, offering additional stability and ease of use. Perfect for shelves with 18-20 mm thickness, it provides a clean and professional assembly option for both shelves and dividers. Durable and efficient, this housing simplifies furniture assembly while ensuring long-lasting performance. Key Features: Plastic knock-in housing for drilled holes in shelves or partitions Designed for use with eccentric connector bolts (bolt not included) Lockable with a PZ screwdriver for added stability Compatible with 18-20 mm thick shelves and dividers Durable construction ensures secure and long-lasting performance Ideal for creating clean and professional furniture assemblies
